

NO LOAD MOTOR TESTER

FEATURES AND BENEFITS

- Intuitive computer graphic interface
- Easy to change test parameters
- User interface to set test and limits
- Database to store test results
- Test results report to the client server
- Computer full controlled
- Test parameters validation with the customer server
- Optional light curtain or mechanical safety guard

AVAILABLE TESTS

Current test
Voltage test
Power test
Resistance test
Hipot test
Rotation test
RPM
Additional testing available

PROCESS & TESTING EQUIPMENT FABRICATION

MECHANICAL
ENGINEERING

ELECTRICAL
ENGINEERING

SOFTWARE
ENGINEERING

TESTING BACKGROUND

ELECTRIC TEST

- voltage
- current
- surge
- hypot
- resistance
- inductance
- capacitance
- power analyze

LEAK TEST

- water leak testing
- air testing
- pressure decay
- vacuum decay
- volume fill

FUNCTIONAL TESTERS

- vision testing
- dimensional measurement
- LIN communication
- CAN communication
- Specific customer communication protocols

CUSTOMER SOLUTION

Through our engineering department we can design and manufacture solutions according to the customer's specification.
