HARNESS TESTER

FEATURES AND BENEFITS

Intuitive computer graphic interface
Easy to change test parameters
User interface to set test and limits
Database to store test results
Test results report to the client server
Computer full controlled
Test parameters validation with the
customer server
Optional light curtain or mechanical
safety guard
Up to 24 independent circuits
Interchangeable nest system to test
different harnesses models
Step and error counters
Light curtain or mechanical safety guard

AVAILABLE TESTS

Insertion test. Correct insertion of contacts
Resistance test
Ground volt test
Low voltage continuity test
Hipot test
Additional testing available

PROCESS & TESTING

EQUIPMENT FABRICATION

MECHANICAL ENGINEERING

ELECTRICAL ENGINEERING

SOFTWARE ENGINEERING

COSTUMER SOLUTION

Through our engineering department we can design and manufacture solutions according to the customer's specification.

TESTING BACKGROUND

ELECTRIC TEST

- voltage
- current
- surge
- hypot
- resistance
- inductance
- capacitance
- power analize

LEAK TEST

- water leak testing
- air testing
- pressure decay
- vacuum decay
- volume fill

FUNCTIONAL TESTERS

- vision testing
- dimensional measurement
- LIN communication
- CAN communication
- Specific costumer communication protocols
