

# WINDING TESTER

## AVAILABLE TESTS

Resistance test with temperature compensation  
Hipot test  
Rotation test  
Corona test  
Balance test  
Additional testing available

## FEATURES AND BENEFITS

- Intuitive computer graphic interface
- Easy to change test parameters
- User interface to set test and limits
- Database to store test results
- Test results report to the client server
- Computer full controlled
- Test parameters validation with the customer server
- Optional light curtain or mechanical safety guard
- Up to 18 measuring circuits
- Light curtain or mechanical safety guard
- Several test points commutation

# PROCESS & TESTING EQUIPMENT FABRICATION

MECHANICAL  
ENGINEERING

ELECTRICAL  
ENGINEERING

SOFTWARE  
ENGINEERING

## TESTING BACKGROUND

### ELECTRIC TEST

- voltage
- current
- surge
- hypot
- resistance
- inductance
- capacitance
- power analyze

### LEAK TEST

- water leak testing
- air testing
- pressure decay
- vacuum decay
- volume fill

### FUNCTIONAL TESTERS

- vision testing
- dimensional measurement
- LIN communication
- CAN communication
- Specific customer communication protocols

## COSTUMER SOLUTION

Through our engineering department we can design and manufacture solutions according to the customer's specification.
